

New Jersey has taken the first step towards the freedom from politics and lobbyists. If FCC wants to stop the 'DONOTCALL' of New Jersey my advise is to try other State where government is sold to Federal Politics. It is every citizen's right to have a quiet dinner time. I will be the first to say that it works in New Jersey and It should be allowed in every state. FCC should take their regulation fees and get off our back. We definitely do not need your nose in our life.

Thank you Governor Codey.
